

An aerial photograph showing several large offshore vessels in the ocean. In the foreground, a large white supply vessel with a helicopter deck is visible. To its right, a red supply vessel is also present. In the background, other offshore structures and vessels are scattered across the blue water.

OFFSHORE
SOLUTIONS
UNLIMITEDTM

Offshore Solutions UnlimitedTM

... offering comprehensive support services

Main Office

Edifício LACS, Rocha Conde de Óbidos, 1350 352 Lisboa, Portugal

Mission

- Our purpose is threefold:
- to provide comprehensive support services to a global clientele.
- to provide project support for ship repair and new building projects.
- to provide innovative products to the maritime industry.

Our Objectives

We have established a network of individuals and companies to be able to give industry stakeholders the support they need! On the following pages you will be introduced to what we have to offer. We assure top quality and timing for all mobilization, ship repair or new construction projects as well as S&P and charter operations.

Our global service network adds further quality and quick turnover for complicated repairs and engineering solutions. Our specialists hail from all parts of the world and bring a wealth of experience that is unprecedented in the industry! One other aspect of our activity is the multi-lingual support that not only considers the business culture in different regions but even more, that of our clients.

Approach

Not Agents

We are not just acting as agents but give active 'hands on' support to the ship owner's and service providers. We are actively working with our clients developing their projects and finding solutions 'within time, within budget', using our own experienced engineers, port captains & ship managers and other experts in their fields.

All Aspects

We are experts in many fields of our industries and always assure a good after sales service to our clients. From S&P to charter, from ship building to ship repair, marketing or finance, we can be the link to develop businesses further! With our multi-lingual communication skills we all will achieve better results together.

Performance

We offer modern products to our clients that improve fuel efficiency of marine engines of all types, reduce emissions, and/or are in general more sustainable than the products or machinery they replace. We can offer complete fleet solutions in this field and also work towards the goal for the 2020 regulations.

S&P Brokerage

Global Coverage & Local Expertise

Our ship brokerage covers following vessel categories. We will always suggest options that we believe are the most fit for the project.

- Offshore Support & Subsea
- Passenger & Accommodation
- HSC Ferries & Crew Transfer Vessels
- Landing Craft & Barges
- Tugs & Dredgers
- Tankers & FPSOs

We have more than 25 years of experience in handling S&P transactions of all sizes in many different parts of the world. We have brokers in all key locations and beyond.

CHARTER & BBHP

Services and Solutions

Our vision is to provide unique Marine Solutions with a positive and dynamic approach, with competitive rates that ensure client confidence, comfort and satisfaction from beginning to end. We exclusively market and provide a wide variety of vessels for use in the offshore industry on spot or term basis. On long term charter projects we often can negotiate bareboat hire purchase agreements.

Towing & Harbor Tugs, Anchor Handling Towing and Supply Vessels (AHTS), Platform Supply Vessels (PSV), Crew Boats, Dive Support Vessels (DSV), Flat Top Barges, Accommodation Vessels, Drilling Rigs and Ships, Utility Boats, Liftboats, FPSOs, etc...

Offshore Construction

Topside Fabrication & Conversions

We are linked with fabrication yards that are specialized in topside fabrication, FPSO conversions, offshore vessel mobilization, right up to installing entire refinery projects or power stations in remote locations. Our network is very powerful and we look forward to quote for your most sophisticated project in any location. We always have a team available also for emergency interventions.

Decommissioning

Decommissioning is an expensive and challenging activity that operators have successfully managed to push into the future for many years. However, for a large part of our aging offshore infrastructure decommissioning is now becoming a reality. We offer comprehensive solutions to tackle your projects

Environmental

Exhaust Gas Cleaning Systems

We offer tailor designed Exhaust Gas Cleaning Systems to our customers, allowing their vessels to operate on “bunker” fuel while complying with the MARPOL Annex VI regulations for the Prevention of Air Pollution from Ships. We prepare your fleet for the Sulphur Cap 2020

Green Ship Recycling

We can offer true 'Zero Impact' Ship recycling facilities. We have teamed up with several companies in this field to develop and licence facilities around the world. We have capacities in Portugal, Turkey, the Philippines, China, USA & Canada available now.

Inspections

Staying compliant

We offer pipeline inspections as well as surveys of subsea structures and in-water surveys. As official IMCA Accredited Vessel Inspectors, we are qualified to carry out special ROV Audits which we offer our clients in addition to IMCA, CMID and MISW Audits. Further we can offer MCA inspections and German compliance certificates. Last but not least our specialists based in SEA can undertake crane inspections on any vessel, platform, structure. Please ask for availability of our inspectors in:

- Germany
- UAE
- Singapore
- USA

Training

...going the extra mile

In collaboration with the Nautical Schools in Paço de Arcos, Lisbon we can offer training sessions for vessel crew. We can arrange for STCW upgrade courses for deck & engine crew (in English) that probably will coincide with dry docking or dockside repair periods.

During our interventions without any further expense we offer as independent consultants to assess our client's vessels with our own engineers to suggest measures to improve efficiency and economy of the operations and check on crew status/motivation, etc.

“

Simplicity is the ultimate Sophistication, Leonardo da Vinci
